Design Skill Set

Product Design – End-to-end product design from research and user flows to final UI and functional prototypes.

Design Systems – Auto Layout, reusable components, design tokens, and scalable systems for consistent experiences.

AI-Assisted Design – Using Figma Make, Claude, and AI tools to explore concepts, build prototypes, and accelerate workflows.

Interaction Design – User flows, interactions, states, and intuitive experiences across complex enterprise products.

Visual Design – Polished interfaces, layouts, illustrations, and visual assets with strong attention to detail.

Web Design – Responsive pages and digital experiences for Zoho Creator, Vertical Solutions, RPA, and AppCreator.

Design-to-Code – Translating designs into functional interfaces through AI-assisted development and design-to-code workflows.
